Taking the second pawn is very dangerous. BCO recommends
 instead 9 Bd3 h6! 10 Ne4 Nd5 11 Ng3 g6 and Black has
 compensation for the pawn deficit. A game Estrin-Ragozin
 USSR 1955 continued 12 O-O Bg7 13 Nc3 O-O 14 Be2 Rb4 15 N:d5

 some initiative on the king-side (ECO).

In his book on the Two Knights, Estrin illustrates Black's
 difficulties with a game Zihlerl-Krishnik Yugoslavia 1956.

 Black has a crushing attack.

The moves for White to avoid are 1 Rh1 and
 1 Rh4. Both fail to 1...Q:g3+ 2 fg3 R:f1+

1 Rh3 and 1 Rh2 are both adequate.

Gulko played 1 Rh4?
